# Cynomolgus TNFRSF9(4-1BB) Protein; His Tag

#### **Product Information**

**Product Name** Cynomolgus TNFRSF9(4-1BB) Protein; His Tag

Storage temp Store at  $\leq$  -70°C, stable for 6 months after receipt.

Recommend to aliquot the protein into smaller quantities for

optimal storage. Please minimize freeze-thaw cycles.

Catalog# / Size GM-88102RP-100 / 100 μg

GM-88102RP-1000 / 1 mg

## **Protein Information**

Alternative Names TNFRSF9, 4-1BB, CD137, CDw137, ILA

Source Cynomolgus TNFRSF9(4-1BB) Protein; His Tag (GM-88102RP) is expressed

from human 293 cells (HEK-293). It contains AA Leu 24 - Gln 186 (Accession #

A9YYE7).

This protein carries a His tag at the C-terminus.

**Purity** > 95% as determined by SDS-PAGE

Endotoxin < 1 EU/μg, determined by LAL gel clotting assay

Predicted Mol Mass 18.6 KDa

**Formulation** Supplied as a 0.2 µm filtered solution of PBS, pH7.2-7.4.

**Description** 4-1BB, also known as CD137, is a member of the TNF receptor superfamily. It is

a transmembrane receptor expressed on activated T cells, NK cells, dendritic cells, and some other immune cells, with inducible expression upon activation. Its ligand, 4-1BBL (CDux/TNFSF9), is typically expressed on antigen-presenting cells. Engagement of 4-1BB enhances T cell proliferation, survival, cytokine production (notably IFN- $\gamma$ ), and sustains anti-tumor and anti-viral responses. Dysregulation of 4-1BB signaling has implications for autoimmunity and

transplant tolerance, and it is a target for immunotherapies.

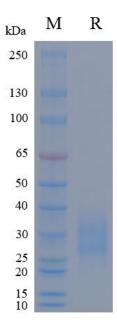

4-1BB signaling is initiated by binding to 4-1BBL, leading to recruitment of adaptor proteins and activation of the NF-κB and MAPK pathways, as well as PI3K-AKT signaling in certain contexts. This promotes T cell survival (upregulation of anti-apoptotic genes), expansion, and effector function, including cytokine production. The pathway can be modulated by co-stimulatory or co-inhibitory signals and can synergize with other TNF family members or checkpoint regulators. Therapeutically, 4-1BB agonists are explored to boost anti-tumor immunity, while excessive activation may cause immunopathology.

Genomeditech (Shanghai) Co.,Ltd. Order: 021-68455258/50432826/50432825

## **SDS-PAGE**

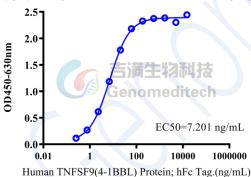

On SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 95%.

## **Bioactivity-ELISA**

#### **Bioactivity-ELISA**

0.2 µg Cynomolgus TNFRSF9(4-1BB) Protein; His Tag of per well

Cynomolgus TNFRSF9(4-1BB) Protein; His Tag (Catalog # GM-88102RP) was immobilized at 2  $\mu$ g/ml (100  $\mu$ L/well). Increasing concentrations of Human TNFSF9(4-1BBL) Protein; hFc Tag (Catalog # GM-88104RP) were added.
